Main Course: February 21 – 24, 2015

Preconference Optional Sessions:
February 20 – 21, 2015 additional fee

Hyatt Regency Scottsdale
Scottsdale, AZ

Course Director:
Vera H. Rigolin, MD, FASE

Course Co-Director:
Steven Lester, MD, FASE

Learning Lab Co-Directors:
Roberto M. Lang, MD, FASE
Bijoy K. Khandheria, MD, FASE

Course Highlights
- Learning Lab:
  - Two days of hands on learning
- Maintenance of Certification (MOC) Session:
  - Maintain your ABIM board certification in a relaxed setting
- Special symposium on Valvular Heart Disease:
  - Latest trends in the treatment of valve disease
  - The novel uses of echo for the treatment of valvular heart disease
- Half-day session on congenital heart disease
- Update on new echo technologies including strain imaging and 3D echo
- Revisit the old standbys: heart failure, CAD, stress echo, pulmonary hypertension, right heart disease
- Cases, cases, cases
Overview of State-of-the-Art Echocardiography

State-of-the-Art Echocardiography is a premier educational venue for cardiovascular ultrasound in clinical practice. This superbly rated meeting is filled to capacity year after year. Although the course is refocused yearly to ensure the most up to date information, topics will include quantitative echocardiography, valvular and ischemic heart disease, stress/contrast echocardiography, advances in imaging in coronary disease, and myocardial diseases. A full-day Heart Valve Symposium will be held on Sunday, February 22, 2015, which will include echo innovations and applications for clinical practice.

Participants should have a practical knowledge of echocardiography to fully benefit from this program. The setting is ideal for participants to bring their families and take advantage of some vacation time.

Objectives

To present recent advances in the diagnosis and treatment of cardiovascular disease to a wide range of cardiovascular health care providers.

To present established and emerging cardiac ultrasound imaging modalities that can be used to provide optimal patient care.

To discuss the ASE guidelines in the context of case examples and clinical applications.

To present information that highlights the utility of an integrated and multidisciplinary approach to patient care.

To provide the opportunity for interaction between experts and practitioners, which will facilitate implementation of information presented into clinical practice.

Upon completion of this program, attendees should be better able to:

- Incorporate state-of-the art clinical applications of echocardiography/Doppler ultrasound into clinical decision-making
- Explain how to use color and spectral Doppler in a quantitative fashion
- Identify specific valvular lesions and understand the various medical, interventional and surgical options for treatment.
- Assess left and right ventricular function quantitatively
- Describe the value and pitfalls of contrast echo
- Recognize how to implement ASE guidelines in management of patients with valvular heart disease, systolic and diastolic dysfunction
- Apply knowledge of echocardiography in the care of patients with left ventricular assist devices and who have undergone heart transplantation

Who Should Attend

State-of-the-Art Echocardiography’s program is designed for adult and pediatric cardiologists, cardiovascular surgeons, anesthesiologists, radiologists, nurses, sonographers and fellows in training. Participants should have a practical knowledge of echocardiography.
Accreditation and Designation
This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the American Society of Echocardiography and the American Society of Echocardiography Education and Research Foundation. The American Society of Echocardiography is accredited by the ACCME to provide continuing medical education for physicians.

The American Society of Echocardiography designates this live activity for a maximum of 36.00 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

ASE designates the State-of-the-Art Echocardiography Learning Lab for a maximum of 13.25 hours, MOC (Maintenance of Certification) Session for a maximum of 3.75 hours, and a maximum of 25.25 hours for the Main Conference. Attendees must have registered for the Learning Lab and MOC Session to claim credit for those sessions.

- Main Conference = 25.25
- MOC + Main Conference = 29
- Learning Lab + Main Conference = 36

ARDMS, CCI, and Sonography Canada recognize ASE’s certificates and have agreed to honor the credit hours toward their registry requirements for sonographers.

This educational activity has been awarded a maximum of 10 BSE re-accreditation points, with no more than 2 points provided per day of attendance.

The American Society of Echocardiography is committed to ensuring that its educational mission and all educational programs are not influenced by the special interests of any corporation or individual, and its mandate is to retain only those speakers whose financial interests can be effectively resolved to maintain the goals and educational integrity of the program. While a monetary or professional affiliation with a corporation does not necessarily influence a speaker’s presentation, the Essential Areas and policies of the ACCME require that any relationships that could possibly conflict with the educational value of the program be resolved prior to the educational session and disclosed to the audience.

Learning Lab (additional fee)
A learning lab will be offered two full days this year on Friday, February 20th and Saturday, February 21st. This workshop requires separate registration and is a part of the total hours of educational content offered at the course. This intimate workshop features easy access to faculty members. Individual computer workstations are provided to teach each participant how to quantitate fundamental aspects of clinical echocardiography. The small group environment allows the opportunity for nearly private instruction from top practitioners in the field.

Maintenance of Certification (additional fee)
The Maintenance of Certification (MOC) Session will be a half-day session on Saturday, February 21, 2015. Upon completion registrants will be given access to an online module to complete to be awarded MOC credits. This session highlights several key topics areas through a study of clinical patient scenarios provided and analyzed by field experts. Guided by faculty moderators and audience response, topics covered will include cardiomyopathies, aortic regurgitation, endocarditis, mitral stenosis, Doppler, congenital heart disease, closure devices/device placement, image optimization, CRT, stress echocardiography and many more. Registrants for this session will be given access to an online module. Upon completion of this online program they will be awarded 10 MOC credits.

Fee
Your registration will be confirmed by email only. Registration fee includes continental breakfasts, breaks, lunches, reception, CME credits, and a memory stick containing course materials.

Cancellations
If you wish to cancel your participation in this course, your registration fee, less a $100 administrative fee, will be refunded when written notification is received before Tuesday, January 22, 2015. No refunds will be made after Tuesday, January 22, 2015. No refund will be given for no-shows.

Registration for any ASE course is non-transferable to another participant or another course. In the event that an individual is unable to attend the conference due to inclement weather or chooses not to attend due to a health epidemic, ASE is unable to refund the conference fee. In the unlikely event the meeting/course is cancelled, ASE is responsible only for refund of the registration fee (minus any processing fee) and not for transportation, hotel accommodations or any miscellaneous expenses incurred by the participant.

Lodging
To secure your room at the Hyatt Regency Scottsdale, please call 888-421-1442 and state that you will be attending the State-of-the-Art Echocardiography program. The room rate is $299 single/double a night. A deposit of one night’s stay plus tax will be held at the time of reservation. Deposit will be forfeited for any cancellations occurring within 72 hours of arrival.

The room block is scheduled to be held until Monday, January 12, 2015, but may be sold out before this date. Therefore, we advise you to register for the program and reserve your lodging as soon as possible. A resort fee of $15 per room per day will automatically be applied. This fee includes in-room wireless internet, access to fitness center, shuttle service to local areas, unlimited use of tennis courts, resort bicycles and golf bag storage. When you make your reservation, please be sure to ask about any additional fees, early departure fees, or cancellation penalties.

Transportation
The Phoenix Sky Harbor International (PHX) Airport is located 18 miles from the Scottsdale area, where the Hyatt Regency Scottsdale is located.
Invited Faculty
