# Program Information

## Overview of State-of-the-Art Echocardiography

This year's program follows the themes of structural heart disease, myocardial and pericardial disease, coronary artery disease, and interventional echocardiography. During the course, over 100 cases will be presented by the expert faculty to highlight what echo brings to each theme, help clinicians recognize and avoid common errors and pitfalls, and learn how to apply the guidelines in a practical manner. Workshops on TAVR and TMVR, the two emerging therapeutic approaches for valvular heart disease, will be a highlight of this course.

The faculty consists of recognized leaders in the field of echocardiography acclaimed for their teaching abilities. Participants will have the opportunity to interact with the faculty one-on-one in the Computer-based Learning Lab featuring advanced hemodynamics, 3D, and myocardial strain imaging including plenty of case studies to practice. Live imaging demonstrations will focus on acquisition techniques for 3D and myocardial strain imaging.

## TAVR and TMVR Workshop

A transcatheter aortic and mitral valve replacement workshop on Saturday afternoon offers an in-depth exploration of the use of echocardiographic imaging in valve disease. As patients become more familiar with valve disease and intervention and more centers are performing these complicated procedures, it is important for practitioners to become more comfortable with diagnosis, intervention, and monitoring.

## Learning Lab Session *(Additional Fee Required)*

A learning lab will be offered for a full day on Friday, February 15 and a half day on Saturday, February 16, 2019. Separate registration is required, and this session is included in the total hours of educational content offered at the course.

Limited to 100 registrants, this intimate workshop allows easy access to faculty members. Individual computer workstations are provided to teach each participant how to quantitate fundamental aspects of clinical echocardiography. The small group environment allows the opportunity for nearly private instruction from top practitioners in the field.

## Who Should Attend

State-of-the-Art Echocardiography's program is designed for adult and pediatric cardiologists, cardiovascular surgeons, anesthesiologists, radiologists, nurses, sonographers, and fellows in training. Participants should have a practical knowledge of echocardiography.

## Course Registration

Registration fees include breakfasts, lunches, breaks, access to course materials, and CME credits and MOC points. ASE members take advantage of reduced registration fees as a benefit of membership. Register online at [ASEcho.org/SOTA](http://ASEcho.org/SOTA).

## ASE Membership

Nonmember registrants for the 32nd Annual State-of-the-Art Echocardiography course will receive a complimentary ASE membership through December 31, 2019, with their registration. This membership is only available to those who have never been a member of ASE. ASE serves its members in numerous ways by providing education, advocacy, research, practice guidelines, and a community for their profession. ASE membership includes over \$750 of FREE CME credits a year, in addition to discounts on all ASE educational courses and products. Also included is a monthly subscription to the *Journal of the American Society of Echocardiography* (JASE), access to CASE, ASE's online case reports journal, help with legislative coding and reimbursement issues, and other career resources. A plethora of online tutorials, webinars, and other educational activities make membership beneficial to echocardiographers located around the world. View the extensive list of member benefits at [ASEcho.org](http://ASEcho.org).

## Learning Objectives

Upon completion of this course, participants will be better able to:

- Incorporate state-of-the-art clinical applications of echocardiography and Doppler ultrasound into clinical decision-making
- Utilize echocardiography in valvular heart disease
- Evaluate patients prior to, during, and following various structural heart disease procedures such as TAVR, mitral clip, and left atrial appendage closure
- Perform a 3D acquisition and measurement of biventricular size and function; and have a better understanding of the "knobology"
- Explain the new diastolic function guidelines
- Assess left ventricular function with state-of-the-art echocardiographic technology including strain imaging

"Overall, excellent course. Enjoyed the ability to interact with faculty. Excellent cases and lectures, as well."

*Past State-of-the-Art attendee*

## Accreditation and Designation

The American Society of Echocardiography is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Pending approval of 34.25 *AMA PRA Category 1 Credits*<sup>™</sup>.

*Maintenance of Certification in Anesthesiology Program*<sup>®</sup> and *MOCA*<sup>®</sup> are registered certification marks of the American Board of Anesthesiology<sup>®</sup>. *MOCA 2.0*<sup>®</sup> is a trademark of the American Board of Anesthesiology<sup>®</sup>.

## San Diego

California's second largest city and the United States' eighth largest, San Diego is renowned for its idyllic climate, 70 miles of pristine beaches, and a dazzling array of world-class family attractions. Popular attractions include the world-famous San Diego Zoo and San Diego Zoo Safari Park, SeaWorld San Diego, and LEGOLAND California. With an average temperature of 72 degrees year-round, San Diego offers an expansive variety of things to see and do, appealing to guests of all ages from around the world.

## Paradise Point Resort & Spa

Paradise Point, San Diego's island resort, is a private 44-acre island tucked away on gentle Mission Bay, minutes from the heart of downtown San Diego. The California beach bungalow-style guest rooms are amidst lush, tropical gardens, and meandering lagoons making this the perfect Southern California resort. You are sure to relax comfortably in the tranquil bayside bungalows, featuring breezy patios with striking views.

Paradise Point features one mile of sandy beach next door to SeaWorld. Scattered across the island, you will find plenty to do with five swimming pools, beach bonfire pits, a marina, five dining venues, and an award-winning spa.

ASE has secured a block of rooms at a discounted rate of \$234 a night. Rooms reserved in the ASE room block will receive the Passport to Paradise, a resort value program that includes high-speed wireless or hard-wired guest room internet, unlimited use of the fitness center, all local and domestic phone calls, and use of guest recreation items such as bocce ball, tennis, basketball, horseshoes, croquet, and ping pong. To make your reservations, please call 800-344-2626 before January 15, 2019 to get this special price and the Passport to Paradise.
